

Stanfield Table Collection

Care & Maintenance

To keep your Stanfield table looking its best, here are some useful care and maintenance tips you should follow:

- A damp cloth can be used to wipe surface spills.
- Coloured liquids such as tea, coffee, coke, juice, ink etc should not contact the stone directly. A drink coaster is recommended.
- Remove stains in a timely manner. An appropriate natural stone cleaner can be used.
- Oil based products such as vegetable oil, machine oil and rust may leave permanent marks if direct contact is made with the stone.
- Do not use acid cleaner or alkaline cleaner on the stone.
- Do not drag sharp and heavy objects directly over the stone.
- Surface scratches can be removed with 600 grade wet sandpaper and finishing with soft wax.
- To maintain luster, apply a soft wax to enhance patina and water resistance.
